

## Urodynamic

### Urodynamic- Pre-Instruction

- Do urine cultivation one week prior to the procedure.
- If outside Riyadh, do the laboratory and bring the result (urine cultivation).
- All females should do pregnancy test.
- Do Corona Virus swab test 2-3 days prior to the procedure if not fully vaccinated.

### Urodynamic-Post Instruction

- Small amount of blood in the urine is normal, and is resolved after drinking plenty of fluids (2-3 liters per day up to 7 days of treatment).
- You can resume normal activities the day after the treatment.
